

Application Platform Delivery Foundations

Version 1, 2026-07-10

Home

Introduction

TITLE1: Red Hat Enterprise Linux 9 (FIXME product)

TITLE2: Break-fix Practice 1 (FIXME title)

Description: This break-fix training simulates a problem FIXME . You'll investigate and solve the problem in a hands-on lab environment to complete the training.

Lab Environment

Instructions to Launch Your Lab on the Red Hat Demo Platform (RHDP)

1. **Log in** to the [RHDP portal](#)
2. **Search** for the catalog entry: **FIXME Lab Catalog Name**.
3. **Click** on the catalog entry in the search results.
4. On the catalog page, **click** the **Order** button.
5. **Fill out** the required details in the order form.
6. **Review the warning** at the bottom of the form and **check the box** labeled: **“I confirm that I understand the above warnings.”**
7. **Click** the **Order** button to place your lab order.

Important Notes:

- This lab may take approximately **FIXME minutes** to become ready.
- You will receive an **email with access details** once your lab environment is ready.
- You can also **retrieve lab access** directly from the RHDP portal.

How to Access Your Lab via the RHDP Portal:

1. On the RHDP portal, **click** on the **Services** option in the left-hand menu.
2. **Select your lab** from the listings on the right-hand side of the page to view access details.

RHDP Portal Links

- RedHat partners: <https://partner.demo.redhat.com/>

What's in this break-fix?

In this break-fix:

Type of issue:

FIXME: Describe an issue type/category that this specific issue falls into, like, "A Red Hat Enterprise Linux 7 system won't boot after a kernel update." Save issue-specific details for the break-fix scenario page.

What you should already know:

FIXME: This training assumes that you are a Red Hat Certified System Administrator (RHCSA) or have equivalent experience administrating Red Hat Enterprise Linux 7 or 8. FIXME - update this as needed

How break-fix training works:

1. Challenge yourself in the break-fix activity. It describes a problem scenario that's simulated in the lab environment where you can investigate and solve the problem.
2. Follow up with the guided solution:
 - a. If you weren't able to solve the problem on your own, read and follow the instructions in the Guided Solution to complete this training.
 - b. If you were successful in solving the problem, read the solution for useful tips you can apply when solving similar problems.

Break-fix activity

This section presents a scenario based on a real customer issue.

1. Read the scenario and success criteria.
2. Follow any instructions provided for setting up your lab environment.
3. Resolve the issue as simulated in your lab environment.
4. After resolving the issue, run the grading script and submit the completion code as prompted.

You must successfully complete this section to receive a passing grade for this module.

If you exhaust your experience and resources, and you're unable to solve the issue on your own, use the guided solution to step through one possible solution, with tips for addressing similar issues.

Check your work

Follow below steps in the lab to check your work

FIXME: Add the instructions to be followed in the lab environment to make sure the problem has been resolved. You may chose to remove this block if grading script is provided in the lab to check the work.

Check your work using the grading script

After you have resolved the issue and met the success criteria, login to **FIXME** system as **FIXME** user and run the grading script as shown here to check your work:

```
break-fix-script grade
```

Sample output

```
[root@classroom ~]# break-fix-script grade
Initiating break-fix-script with option grade
Grading. Please wait.
Success.
COMPLETION CODE: <check your output for this value>
Completed break-fix-script with option grade successfully
```

FIXME: Remove the below block if no grading script is provided to check the work in the break-fix activity. In this case make sure you use the above block to provide step-by-step instructions learner can follow to check their work.

Submit the completion code

Skip this if not applicable for you.

- For RedHat internal audience: Submit that completion code [here](#) to receive a grade for this training
- For RedHat partners: Submit that completion code [here](#) to receive a grade for this training

FIXME: Change the links in the above lines to the link for appropriate audience specific LMS where learner can provide completion code. Remove this block if submitting completion is not applicable.

Guided solution

This section presents a guided solution to the break-fix activity.

Use this section to:

Learn one possible path to resolving the issue.

Get some tips for investigating and resolving similar issues.

If you're still stuck after exhausting your expertise and resources on the break-fix activity:

Use this solution to complete the activity. Check your work when you finish to receive a grade for this activity.

The steps detailed in these solution pages are optional. They provide additional guidance for those struggling with the break-fix activity. We encourage you to only use these pages if you are completely stuck in solving the issue

Guided solution (page 1 of 2)

FIXME: Provide step-by-step instructions here to resolve the issue.

Guided solution (page 2 of 2)

FIXME: Provide step-by-step instructions here to resolve the issue.
